To ensure correct operation, please read this manual carefully before use.

USER MANUAL

The adaptation platform requirements

Android 4.4 and above support.

iOS 9.0 and above support.

Bluetooth 3.0 and Bluetooth 4.0

App download method:

1. can the QR with your smartphone to access to WearPro application

2. Android/Apple:

Android: search for "WearPro" though the software application (Google Play Store) to download and install the application.

Apple: search for " WearPro " though the software application (Apple App Store) to download and install the application.

IMPORTANT: The recommended WearPro app versions for Android and iOS is 1.7.3.

IMPORTANT: Please instead of pairing from smartphone "Bluetooth" settings, follow the steps described on "How to pair" (to get all the Bluetooth communication between smartphone and watch).

NOTE: User can customize the wallpaper of the smartwatch with "WearPro" application. To do this, look for information in the application's user manual.

Care for Vieta Smart Beat 4 before using

To ensure the normal use of smartwatch, please charge it before using it for the first time.

Please use matching charging cable to charge, and connect the charging points on bracelet with the pin on the charger following the correct position.

For charging the smartwatch, please plug the USB end of the charging cable into the USB port of a standard phone charger, desktop or laptop computer with a standard 5V output. Not recommended to charge

using power bank as the output voltage is not of standard 5V.

On the smartwatch screen, the charging process will be displayed, showing the battery status. Once charged it, the full battery will be displayed as full of charge.

It's not possible to set the time of the smartwatch without synchronizing with the Smartphone, because the watch time always show the same as Smartphone have. If you set the time on your Smartphone, it will automatically sync to the smartwatch.

NOTE: The battery consumption of the smartwatch is higher when it remains connected and synchronizing data with your smartphone. Therefore, it's recommended keep it disconnected when you finish to use between them.

Charging instructions

Connect the magnetic connector into the charging position as shown in the figure below, using smartphone charger 5V/1A.

Pair the Vieta Smart Beat 4 with your smartphone

Turn on the smartwatch; press and hold the right button for many seconds to turn the device on (and o).

Verify that your smartwatch is not connected to another smartphone before connecting your smartphone. Otherwise, as the smartwatch is already connected to another smartphone, you will not be able to connect yours. To verify this, on the main watch screen, slide your finger from top to bottom to access the basic settings center, and check that the pairing icon is grey [Bluetooth unpaired (Disconnected)], indicating that there is no active pairing.

Bluetooth not paired.
(Disconnected from smartphone).

Bluetooth paired. – Data.
(Connected to smartphone).

Bluetooth paired. – Data and Calls.
(Connected to smartphone).

In case that this icon appears green, unlink the smart watch from the Smartphone to which it's connected, and thus have a free connection on your watch to make the pairing process with your smartphone.

Available the Bluetooth on your Smartphone. Active your GPS on the smartphone.

Go to Bluetooth settings on your Smartphone, to wait the smartwatch reference, that will appear following the next step.

On your smartwatch Beat 4, on the main screen, swipe from bottom to top to access app center, and select "Call" application. Press on "Open" and will activate the Bluetooth.

Search on your smartphone the reference that will appear on the call application on the smartwatch Beat 4, as Vieta Beat ####. Select this reference, and keep the permissions that require to pair between them.

Smartwatch:

Smartphone:

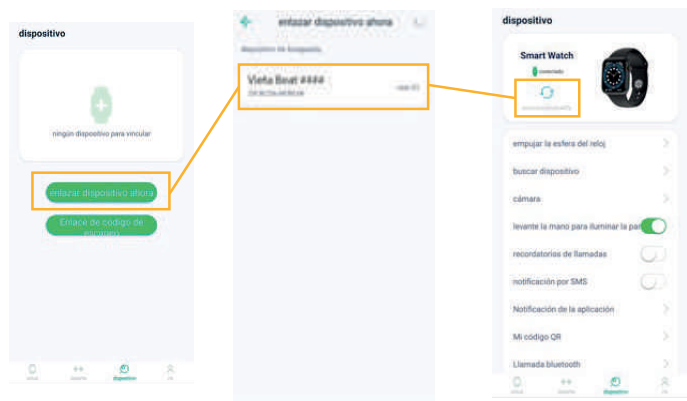

IMPORTANT: This Bluetooth pairing procedure is to be able to perform Call, Music, Notifications and matters not related to the use of the WearPro application.

When you have done this pairing, you will not be able to use a Bluetooth headset or any audio player device on your smartphone. All Bluetooth calling smart watch meet this point.

After pairing the smartphone with the smartwatch, access the WearPro application (previously downloaded from Android Google Play or iOS Play Store).

Access the "Devices" section, select "Link Device Now", and on the devices screen select "Search" (in the upper right corner). Then, select "Synchronize data" to share information.

The "Smart Watch Beat 4" will appear in the device list. Verify that the MAC address is the correct one with your watch. To do this, access the basic settings center on your watch and click on 

IMPORTANT: Before the entire pairing process between Vieta Smart Beat 4 and your smartphone, it is important that you have activated the GPS location of your smartphone, in order to start the pairing process.

IMPORTANT: In the application viewer settings "Gallery" and "Mosaic" all applications are displayed. For the other styles, only the most common are shown.

[1] You can view the stored data of each application; open the application that you want to know and sliding your finger from down to up.

[2] Applications notification center, dialler, call logs, phonebook.

It's important to follow the correct steps in Bluetooth pairing;

1. Pair the Vieta Smart Beat 4 in your smartphone's Bluetooth settings (on your smartphone). Remember to access the call application on your smart watch, to enable communication between both devices.
2. Find the watch and pair in the WearPro app.
3. Synchronize data through WearPro.
4. Allow and validate accessibility permissions on your Smartphone (in Smartphone Security).

Customize your wallpaper

The Vieta Smart Beat 4, has some wallpapers of the smart watch that are editable, and therefore customizable through the WearPro app.

1. Press and hold on the main watch display.
2. When the wallpapers appear selectable, slide your finger from left to right on the watch screen to select the editable wallpaper.
3. Select the editable wallpaper.

4. In the WearPro application, under "Device", follow the steps to edit your wallpaper (for more information, access the WearPro application manual on the manufacturer's website).

Caution

Vieta Smart Beat 4 is designed with IP67 water resistance. It can be in contact with water in rainy conditions or washing hands, but not suitable for submersing under water, showering or swimming.

Synchronize the data every time that you want to access any management and to access at any services of the Vieta Smart Beat 4.

Always use the charging cable to charge on this device included on the box, and not cables from other products.

It's recommended to keep the smartwatch bracelet out of places with humidity or extremely high/low temperatures for a long time to avoid damages.

Don't misuse the rear sensor or look directly into it to avoid possible physical damage.

Please don't disassemble or open the smartwatch to avoid physical damage.

Vieta Smart Beat 4 maintenance

Protect the bottom sensor of your smartwatch.

Clean the surface of the smartwatch with dry cloth. Be very careful if you use soapy water for cleaning (don't use plenty of water) to remove oil or dust.

Don't expose the smartwatch in environments with strong chemicals; gasoline, propanol, alcohol, or insect repellent. Chemicals will damage the smartwatch and the surface damages.

Avoid letting your smartwatch be subject to strong impacts and exposure to extremely high temperatures.

Don't disassembly the smartwatch, will lose its water-resistance.

Common solutions guide

Cannot pair the smartwatch?

Make sure the smartwatch is turned on and activated, and that it's not linked to other smartphone. Place the smartwatch near the mobile phone and search again. If it's still invalid, turn o the Bluetooth of the smartphone for 20 seconds. Then, restart the Bluetooth and search it again.

Should the Bluetooth connection always be active? Will there be any data if it's closed?

Before syncing the data, the exercise and sleep data will be saved in the smartwatch storage. When the smartphone and the smartwatch make the Bluetooth pairing successfully, the smartwatch will automatically upload data to the smartphone. Please, note that the data stored by the smartwatch is limited, and it can only be stored about a week. When the space is full, the first data will be automatically overwritten to save the last data. Therefore, please sync the smartwatch with your smartphone on time.

Observations: the use of the applications related to the management and configuration of services in your smartphone, requires to have the smartwatch linked with your smartphone, if not, they cannot be used.

What should I do if the smartwatch cannot be charged?

Confirm whether the direction of the charger is correct, and the charger is in the correct position contact the smartwatch.

After plugging in the charger, it will immediately enter the charging state. If the smartwatch is turned off due to running out of battery, the screen will take between 3 or 5 minutes to enter the charging state and it will automatically start the watch.

To know the status of the battery, access the "Basic configuration" menu described above.

Remove all information from the smartwatch (Reset Factory)

If data is stored (phone information...) on the smartwatch, and you want to delete it completely to do a new synchronization with another Smartphone device, in your watch go to Settings and select Reset).

Does wearing the smartwatch for a long-time harm to the human body?

The radiation from the device is lowly than the CE and FCC standard and is smallest. Long-term use will not cause radiation damage to the human body.
